SUMMARY

A Bachelor of Science in Computer Science graduate who is focused on a career as a DevOps Engineer with expertise in automation, deployment, monitoring, and Linux-based system management. Has an understanding of CI/CD flows, server management, and stable and sustainable application release processes. Has completed the Dumb Ways bootcamp to strengthen skills in building deployment automation, maintaining system performance, and monitoring to ensure service reliability. Familiar with working in a Linux environment, possesses a problem-solving mindset, and is ready to contribute to a dynamic DevOps team.

SKILL

- **CI/CD** : Jenkins, GitHub Actions
- **Containerization & Orchestration** : Docker, Kubernetes (k3s)
- **Infrastructure as Code (IaC)** : Terraform, Ansible
- **Cloud Infrastructure** : Biznet Gio Cloud, Google Cloud, AWS (EC2, Security Group, VM-based deployment)
- **Operating System** : Windows, Linux (Ubuntu)
- **Monitoring & Alerting** : Prometheus, Grafana
- **Version Control** : Git, GitHub
- **Web Server & Reverse Proxy** : Nginx
- **Security & SSL/TLS**: Let's Encrypt (Certbot), HTTPS, Basic Authentication

EXPERIENCE

UI/UX Designer & Analyst (Intern)

September 2024 – December 2024

SevenInc, Yogyakarta

- Designing wireframes and the UI of the marketplace application using Figma for users and administrators.
- Collaborate with the development team to ensure the design is ready for implementation.

Backend & Deployment Engineer

March 2024 – August 2024

SMK Kartika Nusantara Online Parking Website

- Developing the backend of a web-based parking system application and managing user and transaction databases.
- Deploying applications to hosting servers and ensuring that they run stably.

EDUCATION

S1 Informatics | IPK: 3.44

September 2021 – July 2025

Ahmad Dahlan University

Thesis: *Comparative Analysis of DCT and IWT Steganography Methods on Digital Images Using CIE LAB* (2025)

CERTIFICATIONS & TRAINING

DevOps Bootcamp – Dumbways.id

November 2025 – January 2026

- Intensive DevOps training based on end-to-end projects covering infrastructure provisioning, configuration automation, CI/CD pipelines, containerization, and application deployment to servers and Kubernetes.
- Building and managing centralized monitoring systems, notifications, and implementing basic security practices in Linux and cloud environments.

Google Cloud Computing Foundations Certificate

April 2024 – Juny 2024

- Basic Google Cloud Platform certification covering cloud computing concepts, cloud infrastructure, networking, security, and resource management.
